

Actuarial Reports for Years End 2020 and 2019

STATEMENT OF ACTUARIAL OPINION

Annual Statement of Amalgamated Casualty Insurance Company For the Year Ended December 31, 2020

IDENTIFICATION

I, Derek W. Freihaut, FCAS, MAAA, am associated with Pinnacle Actuarial Resources, Inc. (Pinnacle). I was appointed by the Board of Directors of Amalgamated Casualty Insurance Company (Company) on October 28, 2019 to render this statement of actuarial opinion (Opinion). I meet the definition of a Qualified Actuary per the National Association of Insurance Commissioners (NAIC) Annual Statement Instructions – Property and Casualty, Actuarial Opinion.

SCOPE

I have examined the reserves listed on Exhibit A, as shown in the Statutory Annual Statement of the Company as prepared for filing with the state regulatory officials, as of December 31, 2020. The items on Exhibit A reflect the loss and loss adjustment expense reserve disclosure items (8 through 13.2 and 14) on Exhibit B.

My examination of the loss and loss adjustment expense reserves was based upon data and related information prepared by the Company. In this regard, I relied on Daniel P. McFadden, Vice President of Finance of the Company, as to the accuracy and completeness of the data. I evaluated the data used directly in my analysis for reasonableness and consistency. My evaluation did not reveal any data points materially affecting my analysis that fell outside of the range of reasonable possibilities. In performing this evaluation, I have assumed that the Company (a) used its best efforts to supply accurate and complete data and (b) did not knowingly provide any inaccurate data. I also reconciled the paid loss and loss adjustment expense amounts, case reserve amounts, and earned premium amounts as of December 31, 2020 used in my analysis against Schedule P – Part 1 of the Company's current Annual Statement. In other respects, my examination included the use of such actuarial assumptions and methods and such tests of calculations as I considered necessary.

For this Opinion, loss adjustment expenses include the costs of administering, determining coverage for, settling, or defending claims even if it is ultimately determined that the claim is invalid.

My examination was based on data and related information through the valuation date of December 31, 2020. My opinion was formed based on information provided to me through the review date of February 26, 2020 and my projections do not take into account any developments subsequent to this date.

My review was limited to items on Exhibit A, and did not include an analysis of any income statement items or other balance sheet items. My opinion on the reserves is based upon the assumption that all reserves are backed by valid assets, which have suitably scheduled maturities and/or adequate liquidity to meet cash flow requirements.

OPINION

This is a Reasonable Opinion. In my opinion, the amounts carried on Exhibit A on account of the items identified:

- Meet the requirements of the insurance laws of District of Columbia

- Are consistent with reserves computed in accordance with relevant actuarial standards of practice promulgated by the Actuarial Standards Board, and
- Make a reasonable provision for all unpaid loss and loss adjustment expense obligations of the Company under the terms of its contracts and agreements.

In aggregate, the Company's stated reserves are within a reasonable range of my independent estimates of unpaid loss and loss adjustment expense amounts; hence, the stated reserve amounts make a reasonable provision for the liabilities associated with the specified reserves. This Opinion applies to loss and loss adjustment expense reserves combined.

RELEVANT COMMENTS

The intended purpose of this Opinion is to comply with NAIC Annual Statement Instructions requiring an Opinion as to whether the reserves held by the Company meet the laws of the District of Columbia. The intended users of the Opinion are:

- Regulators in the Company's domiciliary state and all other jurisdictions with which the Company files its Annual Statement
- The Company, and
- The Company's independent auditors.

The stated bases of the reserves presented in this Opinion are full nominal amounts consistent with Statutory Accounting Principles (SAP); no adjustments are made to reflect either the time value of money or the risk of adverse deviation.

Company-Specific Risk Factors

Actuarial estimates of property and casualty loss and loss adjustment expense reserves are inherently uncertain because they are dependent on future contingent events. Also, these reserve estimates are generally derived from analyses of historical data, and future events or conditions may differ from the past. The actual amount necessary to settle the unpaid claims may therefore be significantly different from the reserve amounts listed in Exhibit A.

The following provides major factors and/or particular conditions underlying the risks and uncertainties that I consider relevant to the Company's estimates of unpaid losses and loss adjustment expenses at December 31, 2020:

- The Company's recent expansion into and growth in new states.
- The use of industry benchmarks to supplement the Company's historical loss development experience for the newer states.
- The Company's concentration of risk in auto liability for taxicabs.

The absence of other risks and uncertainties from this listing at this time does not imply that factors will not be identified in the future as having been a significant influence on the Company's reserves. The potential exists that a combination of the above factors and other conditions might arise, thus increasing the Company's risk of material adverse deviation.

Risk of Material Adverse Deviation

Due to the company-specific risk factors indicated above, I believe that there are significant risks and uncertainties that could result in material adverse deviation in the loss and loss adjustment expense reserves. The materiality threshold for this disclosure is \$1.95 million, calculated as 5% of policyholders' surplus. The 5% of surplus provision was selected as it is a commonly used materiality threshold in financial examinations.

Other Disclosures on Exhibit B

The Company has represented to me that it has no unearned premium for long duration contracts, defined as single- or fixed-premium policies with coverage periods of thirteen months or greater which are non-cancelable and not subject to premium increase (except financial guaranty contracts, mortgage guaranty contracts, and surety contracts).

The Company does not discount its reserves listed in Exhibit A for the time value of money.

The Company's reserves listed in Exhibit A are established net of anticipated salvage and subrogation. Anticipated salvage and subrogation disclosed in item 8 of Exhibit B is 0.7% of the Company's policyholders' surplus.

The Company does not participate in any voluntary or involuntary pools.

I have reviewed the Company's exposure to asbestos and environmental claims. In my opinion, the chance of material liability is remote, since no such claims have been reported to date, and the Company did not write lines of business which are typically exposed to such losses.

The Company does not provide extended reporting coverage at no additional premium in the event of death, disability or retirement (DD&R) of an insured. Therefore, the Company has not established a provision for DD&R waiver of premium endorsement.

The emergence of the COVID-19 pandemic in early 2020 creates a substantial source of uncertainty. The pandemic may have a material impact on reserve estimates as its effects emerge over time. The decreased exposure was reflected in reductions to the expected loss ratio in the Bornhuetter-Ferguson methods.

Reinsurance

Based on discussions with Company management and its description of the Company's ceded reinsurance, I am not aware of any reinsurance contract (having a material effect on the loss and loss adjustment expense reserves) that either has been or should have been accounted for as retroactive reinsurance or as financial reinsurance (defined as contractual arrangements that do not include a transfer of both timing and underwriting risk).

My opinion on the loss and loss adjustment expense reserves net of ceded reinsurance assumes that all ceded reinsurance is valid and collectible. The majority of the Company's ceded loss and loss adjustment expense reserves are with companies rated A or better by a reputable insurance rating agency, or are fully collateralized. Other cessions are not material. I have examined Schedule F for the current year for indications of regulatory action or reinsurance recoverable on paid losses over ninety (90) days past due and found none. In addition, the Company has represented to me that it knows of no uncollectible reinsurance cessions. I have not anticipated any contingent liabilities that could arise if the reinsurers do not meet its obligations to the Company as reflected in the data and other information provided to me.

I have reviewed the Part 2 – Property and Casualty General Interrogatory #9 regarding the risk transfer elements of the Company's reinsurance contracts. Furthermore, I have reviewed the Reinsurance Attestation Supplement to the Annual Statement and discussed the Company's reinsurance program with management. I have not performed an independent evaluation of the risk transfer elements of individual contracts; however, I rely on management's representations that the credit for reinsurance is consistent with the Statement of Statutory Accounting Principles No. 62R, "Property and Casualty Reinsurance" (SSAP No. 62R).

IRIS Ratios

I have examined the NAIC IRIS tests for *One-Year Reserve Development to Surplus*, *Two-Year Reserve Development to Surplus*, and *Estimated Current Reserve Deficiency to Surplus*, and no exceptional values were observed.

Methods and Assumptions

There have been no material changes in the actuarial methods and assumptions from those previously employed. There were no material methods or assumptions prescribed by law or regulation, or based on reliance of other sources.

VARIABILITY

In evaluating whether the reserves make a reasonable provision for unpaid losses and loss adjustment expenses, it is necessary to project future loss and loss adjustment expense payments. Actual future losses and loss adjustment expenses will not develop exactly as projected and may, in fact, vary significantly from the projections.

Further, my projections make no provision for extraordinary future emergence of new classes of losses or types of losses not sufficiently represented in the Company's historical database or which are not yet quantifiable.

ACTUARIAL REPORT

An actuarial report, including underlying work papers supporting the findings expressed in this Opinion, will be provided to the Company to be retained for a period of seven years at its administrative offices and available for regulatory examination.

This Opinion is solely for the use of, and only to be relied upon by, the Company, its independent auditors and the various state insurance departments with which the Company files its Annual Statement.

STATEMENT OF ACTUARIAL OPINION

Annual Statement of Amalgamated Casualty Insurance Company For the Year Ended December 31, 2019

IDENTIFICATION

I, Derek W. Freihaut, FCAS, MAAA, am associated with Pinnacle Actuarial Resources, Inc. (Pinnacle). I was appointed by the Board of Directors of Amalgamated Casualty Insurance Company (Company) on October 28, 2019 to render this statement of actuarial opinion (Opinion). I meet the definition of a Qualified Actuary per the National Association of Insurance Commissioners (NAIC) Annual Statement Instructions – Property/Casualty, Actuarial Opinion.

SCOPE

I have examined the reserves listed on Exhibit A, as shown in the Statutory Annual Statement of the Company as prepared for filing with the state regulatory officials, as of December 31, 2019. The items on Exhibit A reflect the loss and loss adjustment expense reserve disclosure items (8 through 13.2 and 14) on Exhibit B.

My examination of the loss and loss adjustment expense reserves was based upon data and related information prepared by the Company. In this regard, I relied on Daniel P. McFadden, Vice President of Finance of the Company, as to the accuracy and completeness of the data. I evaluated the data used directly in my analysis for reasonableness and consistency. My evaluation did not reveal any data points materially affecting my analysis that fell outside of the range of reasonable possibilities. In performing this evaluation, I have assumed that the Company (a) used its best efforts to supply accurate and complete data and (b) did not knowingly provide any inaccurate data. I also reconciled the paid loss and loss adjustment expense amounts, case reserve amounts, and earned premium amounts as of December 31, 2019 used in my analysis against Schedule P – Part 1 of the Company's current Annual Statement. In other respects, my examination included the use of such actuarial assumptions and methods and such tests of calculations as I considered necessary.

For this Opinion, loss adjustment expenses include the costs of administering, determining coverage for, settling, or defending claims even if it is ultimately determined that the claim is invalid.

My examination was based on data and related information through the valuation date of December 31, 2019. My opinion was formed based on information provided to me through the review date of February 13, 2020 and my projections do not take into account any developments subsequent to this date.

My review was limited to items on Exhibit A, and did not include an analysis of any income statement items or other balance sheet items. My opinion on the reserves is based upon the assumption that all reserves are backed by valid assets, which have suitably scheduled maturities and/or adequate liquidity to meet cash flow requirements.

OPINION

This is a Reasonable Opinion. In my opinion, the amounts carried on Exhibit A on account of the items identified:

- Meet the requirements of the insurance laws of District of Columbia

- Are consistent with amounts computed in accordance with the Casualty Actuarial Society's *Statement of Principles Regarding Property and Casualty Unpaid Claims Estimates* and relevant standards of practice promulgated by the Actuarial Standards Board, and
- Make a reasonable provision for all unpaid loss and loss adjustment expense obligations of the Company under the terms of its contracts and agreements.

In aggregate, the Company's stated reserves are within a reasonable range of my independent estimates of unpaid loss and loss adjustment expense amounts; hence, the stated reserve amounts make a reasonable provision for the liabilities associated with the specified reserves. This Opinion applies to loss and loss adjustment expense reserves combined.

RELEVANT COMMENTS

The intended purpose of this Opinion is to comply with NAIC Annual Statement Instructions requiring an Opinion as to whether the reserves held by the Company meet the laws of the District of Columbia. The intended users of the Opinion are:

- Regulators in the Company's domiciliary state and all other jurisdictions with which the Company files its Annual Statement
- The Company, and
- The Company's independent auditors.

The stated bases of the reserves presented in this Opinion are full nominal amounts consistent with Statutory Accounting Principles (SAP); no adjustments are made to reflect either the time value of money or the risk of adverse deviation.

Company-Specific Risk Factors

Actuarial estimates of property and casualty loss and loss adjustment expense reserves are inherently uncertain because they are dependent on future contingent events. Also, these reserve estimates are generally derived from analyses of historical data, and future events or conditions may differ from the past. The actual amount necessary to settle the unpaid claims may therefore be significantly different from the reserve amounts listed in Exhibit A.

The following provides major factors and/or particular conditions underlying the risks and uncertainties that I consider relevant to the Company's estimates of unpaid losses and loss adjustment expenses at December 31, 2019:

- The Company's recent expansion into and rapid growth in new states.
- The use of industry benchmarks to supplement the Company's historical loss development experience for the newer states.

- The Company's concentration of risk in auto liability for taxicabs.

The absence of other risks and uncertainties from this listing at this time does not imply that factors will not be identified in the future as having been a significant influence on the Company's reserves. The potential exists that a combination of the above factors and other conditions might arise, thus increasing the Company's risk of material adverse deviation.

Risk of Material Adverse Deviation

Due to the company-specific risk factors indicated above, I believe that there are significant risks and uncertainties that could result in material adverse deviation in the loss and loss adjustment expense reserves. The materiality threshold for this disclosure is \$1.8 million, calculated as 5% of policyholders' surplus. The 5% of surplus provision was selected as it is a commonly used materiality threshold in financial examinations.

Other Disclosures on Exhibit B

The Company has represented to me that it has no unearned premium for long duration contracts, defined as single- or fixed-premium policies with coverage periods of thirteen months or greater which are non-cancelable and not subject to premium increase (except financial guaranty contracts, mortgage guaranty contracts, and surety contracts).

The Company does not discount its reserves listed in Exhibit A for the time value of money.

The Company's reserves listed in Exhibit A are established net of anticipated salvage and subrogation. Anticipated salvage and subrogation disclosed in item 8 of Exhibit B is 1.0% of the Company's policyholders' surplus.

The Company does not participate in any voluntary or involuntary pools.

I have reviewed the Company's exposure to asbestos and environmental claims. In my opinion, the chance of material liability is remote, since no such claims have been reported to date, and the Company did not write lines of business which are typically exposed to such losses.

The Company does not provide extended reporting coverage at no additional premium in the event of death, disability or retirement (DD&R) of an insured. Therefore, the Company has not established a provision for DD&R waiver of premium endorsement.

Reinsurance

Based on discussions with Company management and its description of the Company's ceded reinsurance, I am not aware of any reinsurance contract (having a material effect on the loss and loss adjustment expense reserves) that either has been or should have been accounted for as retroactive reinsurance or as financial reinsurance (defined as contractual arrangements that do not include a transfer of both timing and underwriting risk).

My opinion on the loss and loss adjustment expense reserves net of ceded reinsurance assumes that all ceded reinsurance is valid and collectible. The majority of the Company's ceded loss and loss adjustment expense

reserves are with companies rated A or better by a reputable insurance rating agency, or are fully collateralized. Other cessions are not material. I have examined Schedule F for the current year for indications of regulatory action or reinsurance recoverable on paid losses over ninety (90) days past due and found none. In addition, the Company has represented to me that it knows of no uncollectible reinsurance cessions. I have not anticipated any contingent liabilities that could arise if the reinsurers do not meet its obligations to the Company as reflected in the data and other information provided to me.

I have reviewed the Part 2 – Property and Casualty General Interrogatory #9 regarding the risk transfer elements of the Company's reinsurance contracts. Furthermore, I have reviewed the Reinsurance Attestation Supplement to the Annual Statement and discussed the Company's reinsurance program with management. I have not performed an independent evaluation of the risk transfer elements of individual contracts; however, I rely on management's representations that the credit for reinsurance is consistent with the Statement of Statutory Accounting Principles No. 62R, "*Property and Casualty Reinsurance*" (SSAP No. 62R).

IRIS Ratios

I have examined the NAIC IRIS tests for *One-Year Reserve Development to Surplus*, *Two-Year Reserve Development to Surplus*, and *Estimated Current Reserve Deficiency to Surplus*, and no exceptional values were observed.

Methods and Assumptions

The Appointed Actuary has changed from the prior year. I was able to review the work of the prior Appointed Actuary and there have been no significant changes in the actuarial methods and assumptions from those previously employed. There were no material methods or assumptions prescribed by law or regulation, or based on reliance of other sources.

VARIABILITY

In evaluating whether the reserves make a reasonable provision for unpaid losses and loss adjustment expenses, it is necessary to project future loss and loss adjustment expense payments. Actual future losses and loss adjustment expenses will not develop exactly as projected and may, in fact, vary significantly from the projections.

Further, my projections make no provision for extraordinary future emergence of new classes of losses or types of losses not sufficiently represented in the Company's historical database or which are not yet quantifiable.

ACTUARIAL REPORT

An actuarial report, including underlying work papers supporting the findings expressed in this Opinion, will be provided to the Company to be retained for a period of seven years at its administrative offices and available for regulatory examination.

This Opinion is solely for the use of, and only to be relied upon by, the Company, its independent auditors and the various state insurance departments with which the Company files its Annual Statement.
